

DYMAX WORK TOOLS

14" RANCH AXE TREE SHEAR FOR SKID STEER LOADERS

OVERVIEW

The Dymax 14" Ranch Axe Tree Shear for skid steer loaders is the ideal tool for general land clearing. Designed for general land clearing where materials are no more than 14 inches in diameter, Dymax 14" Ranch Axe Tree Shears feature solid steel shearing arms that deliver 60% stronger performance compared to competing products.

Dymax 14" Ranch Axe Tree Shears are available with two different styles of shear arms. These are the standard arm and extended arm design. Standard shear arms are ideal for hardwood shearing applications, while open-end extended shear arms are suited for softwood species like cedar trees.

Brush Rack

Base Model

Pushbar

FEATURES AND SPECIFICATIONS

- Designed for machines with a minimum of 1850 lbs of operating capacity, minimum flow rate of 15 gpm. (Single arm grapple model requires machines to have 2250 lbs of operating capacity.)
- Shearing cylinder is rated at 4,500 psi. Equipped with guarded hard line to improve hose protection.
- All units are equipped with universal mount skid steer coupler hooks to work with most new model skid steer loaders. Tree shears are provided with standard flow flat face couplings.
- Options include pushbar, brushguard, single arm grapple.
- Optional 5 gallon sprayer kit system available to prevent regrowth.

Dimensions	Ranch Axe Tree Shear	Pushbar Model	Brushguard Model	Single Grapple Model
