

## FEATURES

- Ruggedly designed and manufactured for piling and stacking brush materials, cleaning up storm debris, and other applications.
- Can be used for limited root removal and land clearing.
- Features include thick, high tensile strength fabricated teeth that are designed to match the machine's ability to produce.
- The back side features a serrated bar which is the perfect tool for backdragging and smoothing raked ground.

## OVERVIEW

**Dymax Loader Root Rakes** are ideal for sorting, raking, ripping and working with stockpiled brush. Available with high tensile strength steel tines, the Dymax Loader Rake provides long lasting performance.

These rakes feature individual tines that can be spaced according to the customer's specifications, or on standard 12" spacing.

Dymax Loader Rakes have been used in such diverse applications as ditch maintenance, small aggregate sorting jobs and tornado and storm damage cleanup. Ideal for jobs that call for a loading tool that allows smaller items to fall through.
