

## 360° LOGGING GRAPPLES FOR EXCAVATOR

**DANGLING  
360°**

**RIGID 360° MOUNT**

### OVERVIEW

**Dymax 360° Log Grapples** for Hydraulic Excavators are ideal for a variety of forestry operations, including landclearing. These log grapples resist side-to-side deflection and provide long lasting performance in demanding environments. The guarding package protects the cylinder and motor drive systems from abusive elements and foreign debris. Easy to remove for servicing.

- Dangling models freely swing and are fitted directly to the excavator stick.
- Rigid mount models attach to pin grab coupler systems and are provided with set of pins.
