

P+ SAND AND GRAVEL BUCKETS**OVERVIEW**

DYMAX Production Plus Sand and Gravel Buckets are designed for use in abrasive materials or extreme wear applications, such as loading sand and gravel or charging asphalt plants.

Buckets incorporate proven design criteria, which yield superior loading characteristics over many general purpose buckets. Dymax Production Plus Sand and Gravel Buckets feature specialized wear plates on the sides and bottom of the bucket.

High tensile wear-resistant steel is used throughout for greater durability, increased strength and abrasion resistance.

Convex Sidecutters
Provide increased material retention per load.

FEATURES AND SPECIFICATIONS

- Production Plus bucket design increases capacity by 15% compared to standard bucket models, without affecting the machine stability.
- Convex side bars allow operators to retain more material.
- Specially designed spill plate retains the load and directs material away from the pins.
- Wear plates protect the integrity of the floor and sides of the bucket.
- Straight or Spade nose available.
- Available in direct pin-on models, or with hooks installed to work with the Dymax coupler system or other popular couplers.

Spill Plate

Helps keep sand and materials away from lift arms.

Options

Spade nose edge, specialized liner system such as Hardox and Carbide Overlay.
