FORESTRY AND LAND CLEARING ATTACHMENTS

DEMAND DYMAX FOR DURABILITY

HPX TREE SHEARS

- REMOVE TREES FAST & EFFICIENTLY FROM THE SEAT OF YOUR MACHINE.
- EXCELLENT FOR FIRE PREVENTION, RIGHTS OF WAY AND PLANTATION THINNING OF PULP WOOD.

WE'RE THE ORIGINAL RECIPE. IMITATED BUT NEVER DUPLICATED.

HPX TREE SHEARS - EXCAVATOR & BACKHOE

Cut more trees. Cut harder woods. Cut ground level. The Dymax Tree Shear is the king of tree shears and provides the strongest design for cutting woods of all types, including hardwoods. Ideal for biomass clearing operations and applications for removing diseased trees, fire prevention methods, water conservation, power line utility tree removal and all general clearing operations where trees of all sizes and shapes need to be removed. Available for excavators and backhoe loaders.

WORLD'S TOUGHEST TREE SHEARS

From 8in to 21in, Dymax has a size for every job and machine capacity.

US: 1-800-530-5407 | WORLDWIDE: 1-785-456-2081 | sales@DYMAXINC.com

EASY TREE REMOVAL

BRING DOWN THE BIGGEST TREES IN SECONDS. IDEAL FOR TREE CLEARING CONTRACTORS, HIGHWAY DEPARTMENTS, FOREST AND LAND MITIGATION, BIOMASS OPERATIONS.

ADAPTABLE

+ BOLT-ON MACHINE INTERFACE
+ 60° OR 180° OPTIONAL ROTATOR
+ OPTIONAL VALVE CONTROL GROUPS

FASTER CUTTING

LARGER HOSE LINES AND VALVE GROUPS PROVIDE FASTER CYCLE TIMES. CUT TREES IN SECONDS. HOSES AND VALVE PROTECTED INSIDE HOUSE.

MORE POWER. GUARANTEED.

TWIN CYLINDERS DELIVER NEARLY 2x THE CUTTING FORCE COMPARED TO SINGLE KNIFE SHEARS. INNOVATIVE DESIGN MAXIMIZES POWER DURING THE CUT WITH LESS ARM DEFLECTION.

FORESTRY AND LAND CLEARING ATTACHMENTS

DEMAND DYMAX FOR DURABILITY

ROTATING LIMBSHEAR

TOUGH AND DEPENDABLE

With 180° of hydraulic rotation, these shears will adjust to the limb or tree, making them excellent for pruning operations along roadsides or rail lines.

- Compact frame design for congested applications.
- Super fast cycle time.
- Heavy duty replaceable shear blade comprised of high tensile steel.
- Hoses and fittings are well protected from abusive elements found in shearing applications.
- 180° total hydraulic rotation.
- Available in 10", 14" or 20" diameter cutting capacity.
- Available without rotation for tiltrotator applications.

Machine Type	Model	Cut Diameter (in / cm)
Excavator	DX-TS-RLS-10in-HX-8T	10 in / 25cm
Backhoe	DX-TS-RLS-10in-BL-10	10 in / 25cm
Excavator	DX-TS-RLS-14in-HX-20T	14 in / 36cm
Excavator	DX-TS-RLS-20in-HX-36T	20 in / 51cm
Models include 12/24V electro-hydraulic kit. Please contact Dymax for custom solutions 1-800-530-5407.		

VORTEXMAX BRUSHCUTTER - EXCAVATOR

STANDS UP TO THE ABUSE

The Dymax VortexMax Brushcutter is a rotary brushcutter designed to destroy trees and vegetation up to 8 inches in diameter. Equipped with heavy duty balanced cutting disk and (3) AR400 replaceable cutting knives.

THE BALDERSON FAMILY LEGACY

More than a Century of Commitment

What's in a name? Sometimes not much. Often everything. Dymax was born amidst the values and beliefs of the Balderson family. It's a name that has long stood for quality, integrity and service.

We've been working with iron and steel for more than 135 years. In the early days it was as simple as repairing wagons, shodding horses and performing basic blacksmithing tasks in and around the small community of Wamego, Kansas. As time evolved, so did machines and so did we. Yet one thing remained the same – our family tradition of providing the highest quality, best engineered solutions to meet customers' needs. We stand behind what we build and always drive toward building it even better. The world has changed since Seth Balderson opened his blacksmith shop in 1875, yet our family creed remains intact:

WE TREAT EVERY CUSTOMER AS IF THEY WERE OUR ONLY CUSTOMER!
