STILL BUILT LIKE GRANDPA TAUGHT US
A Balderson family tradition since 1930

THE BALDERSON FAMILY LEGACY

More than a Century of Commitment

What's in a name? Sometimes not much. Often everything. Dymax was born amidst the values and beliefs of the Balderson family. It's a name that has long stood for quality, integrity and service.

We've been working with iron and steel for more than 135 years. In the early days it was as simple as repairing wagons, shodding horses and performing basic blacksmithing tasks in and around the small community of Wamego, Kansas. As time evolved, so did machines and so did we. Yet one thing remained the same – our family tradition of providing the highest quality, best engineered solutions to meet customers' needs. We stand behind what we build and always drive toward building it even better. The world has changed since Seth Balderson opened his blacksmith shop in 1875, yet our family creed remains intact:

WE TREAT EVERY CUSTOMER AS IF THEY WERE OUR ONLY CUSTOMER!
