IF YOU'RE BRUTAL ON BUCKETS, DEMAND DYMAX

SAND & GRAVEL BUCKETS - WHEEL LOADER

Dymax Sand and Gravel Buckets are designed for use in abrasive materials or extreme wear applications, such as loading sand and gravel or charging asphalt plants and quarries.

These buckets incorporate proven design criteria, which yield superior loading characteristics over many general purpose buckets.

Operating Weight (lbs)	Capacity (yd³)	Options
42,000-47,500	4.50-5.25	<ul style="list-style-type: none">• Straight or Spade Nose• Liners• Replaceable side-bar protectors• Custom designs
48,000-56,000	5.50-6.50	
66,000-80,000	7.50-9.60	
108,000-124,000	10.00-12.50	
Design and specifications are subject to change without notice. Please contact Dymax for custom solutions 1-800-530-5407.		

KEY FEATURES

1. Auxiliary heavy duty spill guard
2. Radial side cutters retain more material with less spillage
3. Choice of spade or straight edge
4. Specialized bucket liners: AR400, carbide overlay
5. Extra wear plates
6. Wedge floor design with rear bolt-on wear plates

THE BALDERSON FAMILY LEGACY

More than a Century of Commitment

What's in a name? Sometimes not much. Often everything. Dymax was born amidst the values and beliefs of the Balderson family. It's a name that has long stood for quality, integrity and service.

We've been working with iron and steel for more than 135 years. In the early days it was as simple as repairing wagons, shodding horses and performing basic blacksmithing tasks in and around the small community of Wamego, Kansas. As time evolved, so did machines and so did we. Yet one thing remained the same – our family tradition of providing the highest quality, best engineered solutions to meet customers' needs. We stand behind what we build and always drive toward building it even better. The world has changed since Seth Balderson opened his blacksmith shop in 1875, yet our family creed remains intact:

WE TREAT EVERY CUSTOMER AS IF THEY WERE OUR ONLY CUSTOMER!
